County level population by race ethicity 2010-2019

Name: SREEPRATHAP M

Organization: Entri Elivate

Overview of Problem Statement

The population by race and ethicity census data of 2010-2019 of 'US' is a collection of population of different ethnic groups like the white population, Asian population, Native American population, and so on. By predicting the major ethnic group or race population, we can identify which population of people contributes more to the country in various aspects.

Objective

To figure out major ethnic group predictions using machine learning techniques.

Data Description

Source:

County level population by race ethnicity 2010-2019

Features:

- (1).fips:- State and county FIPS code,
- (2).stfips:- State FIPS code,
- (3).cofips:- County FIPS code,
- (4).state abbrev:- Stae abbrevation,
- (5).state: State name,
- (6).county:- County name,
- (7).year:- Year,
- (8).pop:- Total population(all races),
- (9).white_pop:- White population,
- (10).black_pop:- Black population,
- (11).asian_pop:- Asian population,
- (12).indian_pop:- Naive American or Alaska native population,
- (13).pacific_pop:- Native Hawaiian or other Pacific islander Population,
- (14).two_pop:- Tow or more races population,
- (15).not_hisp_pop:- Non-Hispanic population (independent of race),
- (16).hisp_pop:- Hispanic population(independent of race)

Data Collection

```
